Giuseppe D'Angelo (Naples, 1955) graduated in Theoretical Physics and he initially worked in informatics firms while at the same time working on research projects at the Faculty of Physics of Bologna University. He then became involved in teaching and is currently teacher for General Informatics at the Francesco Giordani Technical Industrial Institute of Naples. For many years he has been professor of Informatics Basics at the Federico II University of Naples and at the Second University of Naples. He has taken part in the Work Group of the Ministry of Education for the development of General Informatics Programmes for the newly created Technological High Schools.

For about 25 years he has been an expert consultant for several Italian and European organizations in Research and Development, Technological Transfer and Education Projects . He has wide experience in e-Learning, Teleworking, e-Government and Innovative Publishing. In the field of education and training, he has been the conceiver and coordinator of many Italian and European projects. Moreover, he has built up a specific competence in a number of Community Programmes and Initiatives, such as: ADAPT, Socrates, Leonardo da Vinci, EQUAL, Research Framework Programme. He is the author of many articles in the field of didactics, education and research and together with Prof. Anna PERROTTA, published a book on the didactics of informatics and mathematics "Logica e Linguaggi Formali" with the publishing house CEDAM of Padova. He has also published (as editor) the books: "Percorsi Non Tradizionali per l'Accesso al Lavoro" ("Non Traditional Pathway to access in the Job Market") INTRAMOENIA publisher in Naples and "From Didactics to e-Didactis - e-Learning Paradigms, Models and Techniques", Liguori Editori publisher in Naples.
